

# DecisionsFirst Modeler Starter Services

DecisionsFirst Modeler is a collaborative decision modeling solution that makes it easy to model decisions as part of your requirements process. It is based on the new Decision Model and Notation (DMN) standard to future proof your decision models and skills.

## Starter Services

Our online [DecisionsFirst support](#) site includes free tutorials and training videos. Plus you can access free white papers, recorded webinars and other resources on [Decision Management Solutions](#).

We also offer three levels of starter services:

- ▶ **Model Building Service**  
We build an initial decision model based on your existing requirements documents.
- ▶ **Online Training**  
Online, interactive modeling sessions providing coaching and advice as you build your decision model.
- ▶ **Jump Start Service**  
2 days onsite designed to make your project and team quickly productive and self-sufficient.

Our starter services help you get started quickly for a fixed price.

Decision modeling is the proven approach to system design and requirements gathering that meet the needs of today's organizations to be more flexible, analytical and customer driven.

With decision modeling:

- ▶ Business processes are less complex improving flexibility and agility.
- ▶ Business rules management has structure, easing implementation.
- ▶ Predictive analytics projects have a framework linked to results.
- ▶ Dashboards have a logical structure for going beyond information presentation to actions and recommendations.
